

ABDUL REHMAN

Full Stack Developer | MERN Stack | React Native

+92 334 9503347 | rehmanmirza458@gmail.com | Jhelum, Punjab, Pakistan | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 2+ years of industry experience building production-grade web applications using the MERN stack. Delivered 3 live commercial platforms across fintech, travel, and heritage-tech domains. Holds a BS in Computer Science (CGPA 3.66/4.00) and demonstrates consistent ability to architect scalable frontends, integrate third-party APIs, and ship responsive interfaces on tight timelines.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, PHP, Python, Typescript
Frontend: React.js, Next.js, React Native, Tailwind CSS, Bootstrap, Redux
Backend: Node.js, Express.js, NestJS, Laravel
Databases: MongoDB, MySQL
Tools & Platforms: Git/GitHub, Docker, VS Code, Figma, WordPress

PROFESSIONAL EXPERIENCE

MERN Stack Developer | [Rev9Solutions](#) | Onsite | Jun 2025 – Jun 2026

- Engineered and maintained full-stack features across multiple client projects using React.js, Node.js, Express.js, and MongoDB within a team of 4–5 developers, ensuring on-time delivery.
- Collaborated with cross-functional teams to translate design mockups into pixel-perfect, responsive interfaces, reducing UI revision cycles.
- Implemented RESTful API integrations and third-party service connections, improving data flow and application reliability.
- Participated in code reviews and adopted Git-based workflows to uphold code quality standards across the team.

Web Developer | [IJ Technologies](#) | Pakistan | Jun 2024 – May 2025

- Developed and deployed production web applications serving real end-users across 3 live commercial platforms.
- Built Soarfare, a flight booking platform, contributing to a smooth multi-step booking flow and responsive front-end that handles real-time travel queries.
- Contributed to Vyafac, a Stripe-like payment marketing site, delivering a clean, conversion-focused UI that effectively showcases the platform's fintech features.
- Delivered Archnova, a heritage-tech SaaS for archaeologists, implementing artifact upload workflows and 3D model generation features.
- Maintained coding standards and collaborated with senior developers to resolve bugs and ship updates under agile sprint cycles.

COMMERCIAL PROJECTS

Soarfare – Flight Booking Platform [soarfare.com](#)

- Architected a multi-step flight search and booking flow using React.js, integrating live travel APIs to return real-time flight availability and pricing.
- Engineered a responsive, mobile-first UI that reduced friction in the user booking journey, resulting in a clean end-to-end purchase experience.
- Collaborated with backend engineers to ensure seamless API data handling and error states across the booking funnel.

Vyafac – Payment Platform [dev.vyafac.com](#)

- Built the complete marketing website for a Stripe-alternative payment platform, prioritizing conversion-focused design and professional brand presentation.
- Implemented fully responsive layouts across all breakpoints, ensuring consistent experience on mobile, tablet, and desktop devices.

Archnova – Archaeological Data Management app.archnova.uk

- Developed artifact upload and management workflows enabling archaeologists to digitize, categorize, and retrieve physical artifact data at scale.
- Integrated 3D model generation capabilities, allowing scanned artifact data to be visualized interactively within the platform.
- Supported team collaboration features including research team creation and role-based access to artifact datasets.

Aiviont – Digital Marketing SaaS Platform · app.aiviont.com

- Engineered a full-stack multi-tenant platform enabling digital marketers to create organizations, onboard brands, and manage presence across 6+ platforms including Google, TikTok, Facebook, Instagram, and YouTube from a single dashboard.
- Built KPI analytics and stats aggregation features pulling data across 5+ social/ad platforms to surface actionable insights for marketers.
- Implemented automation workflows triggered by platform performance data, reducing manual campaign management effort.

SwagPrint – Custom Promotional Products E-Commerce · swagprint.com

- Developed and maintained a large-scale e-commerce platform serving 10,000+ products across custom branded merchandise including apparel, accessories, and promotional items.
- Built product customization and ordering workflows supporting bulk orders, rush delivery options, and real-time pricing logic.

PERSONAL PROJECTS

E-Commerce Store with AI Recommendation Engine (Web & React Native)

- Built a cross-platform e-commerce application with a personalized product recommendation engine, delivering tailored shopping experiences on both web and iOS/Android.
- Developed the React Native mobile app alongside the React.js web client, sharing business logic across both platforms to reduce development overhead.

Point-of-Sale (POS) System

- Engineered a full-featured POS application handling sales transactions, real-time inventory tracking, and customer management for retail operations.
- Designed an intuitive dashboard that streamlined daily retail workflows, reducing manual record-keeping and improving transaction accuracy.

Study Stack – Student Knowledge Sharing Platform

- Built a web application enabling students to upload, share, and download study notes, creating a collaborative academic resource hub.
- Developed full-stack features using Next.js, Tailwind CSS, and MySQL, delivering a fast and responsive experience across devices.
- Implemented content sharing workflows allowing students to discover and access peer-uploaded materials organized by subject.

EDUCATION

BS in Computer Science | CGPA: 3.66 / 4.00 | 2021 – 2025

University of the Punjab – Jhelum Campus
